

Siken Charging Assembly

Siken Hydraulics provides all kinds of accumulator charging Nitrogen Charging Cart (Booster) and Charging assembly for the customer to get the designed pressure on different applications.

Nitrogen charging assembly

Siken Hydraulic provides different kinds of nitrogen charging assembly to charge the accumulator produced by major accumulator mfg' all over the world. An accumulator charging assembly is a system or device used to charge or recharge accumulators. The charging assembly ensures that the accumulators are properly pressurized and ready for operation. The accumulator charging assembly typically includes components such as a charging pump, pressure gauges, control valves, relief valves, and connectors.

Model

SCA-25-3-GC

Gas bottle thread: GC=G5/8, GR=G3/4-RH, WL=W21.8-14LH,
WR=W21.8-14RH, CGA=CGA580

Hose length (M): 1.5, 3, 5, 10

Pressure Range (Bar): 10, 25, 63, 100, 160, 250, 400, 630

Code: SCA-25-3-GC
